Frontend Developer

August 2024 - Present

Project: [To-do List using LocalStorage](#)

This to-do list project was developed with React and uses localStorage to store tasks. Users can add, mark as complete, and delete tasks. It allows for easy and efficient management of activities.

Project: [Login Page](#)

The login page was created with React, JavaScript, HTML, and CSS. It includes Login and Account Creation screens with a responsive design for a smooth and intuitive experience. The Login screen allows users to access their accounts, while the Account Creation screen enables new user registration.
